

AMBREY 

GUARDIAN

World leading intelligence-led, asset-integrated risk management solutions that protect your crews, vessels and reputations.

GUARDIAN

Guardian is an asset-integrated, intelligence-led risk management solution, delivering a suite of custom advisory services designed to reduce risk to the lowest acceptable level. The service will allow you to exploit market opportunities, while satisfying core compliance and duty of care requirements.

Developed in answer to both enduring and emerging threats worldwide. *Guardian* leverages Ambrey's privileged sources and proprietary methodologies to forecast exposure and respond. That response comprises of both virtual advisory and protective security mitigations.

FEATURES

- A Transit Risk Assessment set against prevailing threats delivered via best-in-class geospatial mapping software
- Remote BMP gap analysis, with recommendations for enhancing vessel infrastructure and crew operations
- Threat briefings for the Master and crew, together with alerts pushed to the vessel in near real-time
- Tracking and dynamic route adjustment through Ambrey's Maritime Risk Intelligence platform
- Crisis response and liaison with regional authorities, should it be required
