

Ambrey Analytics Ltd, part of the Ambrey Group, and Diaplous Maritime Group have agreed a new global digital partnership in a first for the maritime security industry. As the largest two service providers in their sector Ambrey and Diaplous work across the global shipping fleet to improve security and help provide safe navigation in the most hostile and complex maritime environments. **Their new partnership sees Ambrey's digital intelligence services 'Guardian' and 'Sentinel' integrated into the suite of security risk management services Diaplous offer to their clients in the shipping and offshore sectors.** These digital services keep Master's and shore-based personnel informed of global security events relevant to the location, route, and destination of their vessel, whilst assessing, managing, and reducing their risk and costs in real time. The partnership is agreed at a time of heightened tensions, in the Middle East and when ship owners and operators are facing a host of complex and diversified maritime perils globally.

In the world of digital maritime risk management, scale, reach, and experience matters. Under this partnership, Ambrey and Diaplous will integrate these core pillars to improve their collective maritime domain awareness, generate unique data, and provide insights and reporting which are unrivalled in the market. Using their combined teams of specialist maritime experts, this global digital partnership will combine Ambrey's technology, data, and artificial intelligence software with Diaplous' new, state of the art 24/7 operation centre to forecast and identify security risks – reducing risk to seafarers and saving their clients time and money.

Ambrey Analytics utilises proprietary technology to leverage the scale, reach and expertise of the Ambrey Group. Ambrey was established in 2010 and is headquartered in the United Kingdom with regional offices and operations worldwide employing a team of over 120 full-time staff and 1,000 managers, operators, and crew. The Ambrey group cooperates and partners with over 50 international naval forces, coastguards, and regional coordination centres worldwide and supports many hundreds of clients and thousands of vessels around the world.

Diaplous Group is a security, defence and crisis management company providing both maritime and land-based holistic risk management solutions on a global scale, by implementing a robust process in identifying and mitigating clients' threats and vulnerabilities with a wider scope to enable them to be more stable, productive, and efficient. Diaplous utilizes its operatives' combined experience, expertise, and know-how, to provide full-spectrum support, ranging from consultancy to on the ground implementation and rapidly develops new services and sophisticated systems addressed to an impressive client base comprising of ship owners, ship managers, multinational and international companies, oil & gas firms, and major energy companies.

AMBREY **Chris Charnley, Ambrey Group Managing Director said;**

“We believe that the ability to share our collective intelligence and information together with Diaplous, will help reduce the risks to vessels and their crews around the world. Collectively we leverage knowledge gained in supporting over 100,000 voyages worldwide since our two companies were founded and an understanding of the range of threats to organisations, their assets, and their people in a way unique in the industry. Collectively we support over 3,500 vessels every day around the world. Together, we can help ensure the valuable information we collect gets to those that matter in a timely and efficient manner. Helping the decision makers at all levels; the Master and the shore-based Team to make choices that make a difference. Filtering out the noise and establishing the facts that impact the decisions we make to help reduce risk and keep people and your assets safe.”

 **DIAPLOUS****Manolis Lazaridis, Diaplous Maritime Group CEO said;**

“Diaplous and Ambrey have been at the top of the maritime risk management sector for over a decade. For more than a year we have been jointly invested in innovation and cooperation to better support our clients around the world with new services that continue to recognise the evolving risks our clients face in an increasingly dynamic and challenging environment.

Combining our collective experience, knowledge, and commitment to reducing risk, we have together invested in the innovative solutions of Ambrey Analytics to better serve the industry and our clients beyond just physical security services. This has created unique access to information that transform visibility, predictability, and support to those at sea at a time when heightened tensions and attacks against shipping are ever present.”
