Ambrey partners with Chartworld to deliver Global Security Alerts via ECDIS

Ambrey, a leading global provider of maritime security and risk management services, is proud to announce a strategic partnership with Chartworld, a premier provider of digital navigation solutions. This collaboration aims to enhance the safety and security of vessels worldwide by delivering real-time global security alerts directly to shipmasters through the Electronic Chart Display and Information System (ECDIS).

In an increasingly complex maritime environment, where security threats can emerge suddenly and unpredictably, timely and accurate information is critical to ensuring the safety of crew, cargo, and vessels. By integrating Ambrey's comprehensive security intelligence with state-of-the-art ECDIS and ChartWorld Information Overlay + service, shipmasters can now receive instant alerts on potential security threats covering war, crime, narcotics, migration, and activism as they navigate.

Key Benefits of the Ambrey-Chartworld Partnership:

Real-Time Security Alerts: Shipmasters will receive immediate notifications of security threats in their vicinity, allowing them to take proactive measures to avoid danger and ensure the safety of their crew and cargo.

Seamless Integration: The integration of Ambrey's security alerts into an ECDIS is designed to be user-friendly, requiring no additional hardware or complex installation processes to ensure a smooth transition and uninterrupted navigation for vessels.

Global Coverage: Ambrey's extensive intelligence network covers all major maritime regions, providing comprehensive security alerts regardless of the vessel's location.

Enhanced Decision-Making: With real-time security data available directly on the ECDIS, shipmasters can make more informed decisions regarding route planning and risk mitigation, reducing the likelihood of encountering dangerous situations.

Christopher Crookall, CCO of Ambrey, commented on the partnership: "We are excited to join forces with Chartworld to bring our security expertise directly to the fingertips of shipmasters. This collaboration is a significant step forward in our mission to protect lives and assets at sea by providing the most accurate and timely security information available."

Oliver Schwarz, Business Development Director at Chartworld, added: "By integrating Ambrey's security alerts into an ECDIS, we are enhancing the value we offer to our clients. This partnership enables us to provide a more comprehensive navigation solution that not only guides vessels safely but also keeps them informed about potential security threats."

The Ambrey security intelligence layer will now be available for all models of leading ECDIS providers, delivering an essential tool for enhancing maritime safety and security in an ever-evolving global landscape.
