DIGITAL RISK MANAGEMENT

Elevate your business and partner with the best in Digital Maritime Risk Solutions.

DIGITAL RISK MANAGEMENT

“A well-chosen intelligence provider has the power to revolutionise your operations at sea, ensuring they meet and exceed industry standards for safety, effectiveness, and efficiency.”

To make the right decision, here are five essential factors to consider when selecting your risk intelligence provider:

www.ambrey.com

1. RELIABILITY – secure a supplier with a reputation for providing reliable and precise information that has stood the test of time. Query their forecasting methodology, to understand how they arrive at their predictions and the factors they consider. Transparency regarding their approach is key. Be aware of any dependencies that might impact the reliability of their intelligence, such as external data sources and software team.

2. COVERAGE – when selecting a digital risk provider, it is crucial that your supplier can demonstrate their expertise in covering both the thematic depth to align with your risk appetite and the geographic breadth to match your trading footprint. Your chosen provider should possess a deep understanding of the specific risks that impact your industry and be equipped to provide comprehensive insights in those areas.

3. TIMING – in a rapidly evolving world, the ability to obtain accurate and timely information is paramount. By accessing intelligence services at the right time, you gain a competitive advantage, enabling you to make informed decisions and stay ahead of the curve. Invest in intelligence services that deliver real-time insights and unlock the power of being in the right place, at the right time, for unparalleled business growth.

4. CUSTOMISATION – this is a crucial factor to consider when selecting a service provider. Evaluate whether they offer customisable solutions that can be tailored to meet your specific requirements. A provider that understands the unique needs of your business and offers flexibility in their services can ensure a smooth onboarding experience, which is essential to minimise disruptions and maximise productivity.

5. SERVICE SUPPORT – a key thing to consider when evaluating digital risk services is the level of service support. It is important to assess what is offered in terms of accessibility and expertise. A knowledgeable response to time-sensitive queries can make the difference between a good decision and choosing the optimal course of action. A responsive team can provide valuable guidance and insights when you need it most.

AMBREY

SENTINEL

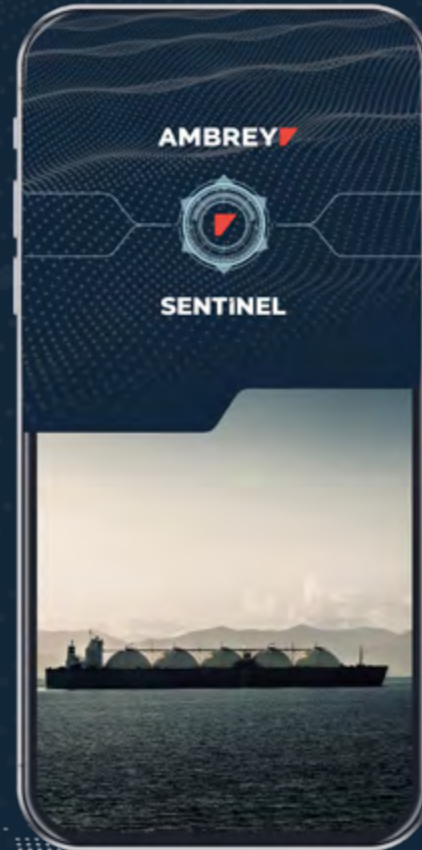

GLOBAL ALERTS SERVICE

Over 1 trillion pieces of data are created everyday - cutting through this noise is now crucial for business and global trading.

SENTINEL is the new **Global Alerts Service** which pushes actionable intelligence to seafarers - the system raises risk alerts specific to your vessels - understanding where you embarked, where you are now and your destination.

No app, hardware, platform or software is required, no login and no password - we manage and tailor your system requirements and proximity settings for your fleet or for your voyage.

SENTINEL scans millions of maritime data points - we then extract and qualify threats, to identify and broadcast unique actionable risk alerts that enable your crews to make the right decision, at the right time.

GLOBAL DYNAMIC THREATS

Drone attacks, political tensions, Narcotics, migration, robbery - the seafarer, the CSO and the business leader must now navigate wide ranging and complex global operating environments to deliver strategic resilience.

SENTINEL - ALERTS are delivered via:

- Email
- Portal
- WhatsApp/SMS

AMBREY SENTINEL - COMMUNITY

Ambrey provides risk management services to over 1000 vessels every single day, our community offers first hand insights and risk awareness to all users on the water - contributing to a safer and more secure shipping industry.

GUARDIAN

With over 15 High Risk Areas and threats emerging and developing, it is important that masters receive vessel and area specific operational support during voyages.

GUARDIAN is a best-in-class digitally supported **Watchkeeper Service**, designed to deliver operational support requirements and provide clients with an optimised and dynamic risk assessment, to keep risk at the lowest acceptable level wherever and whenever it is most needed.

We oversee every stage of the voyage - your vessel, its route and its proximity will be constantly monitored as it joins the largest risk managed fleet in the world.

AMBREY combines the world's largest maritime team of operations managers, watchkeepers, in house thematic and geographical analysts with our 24/7-365 Global Operations Centre to deliver this unique service.

GUARDIAN proactively identifies your risk, informs you of optimal mitigation, and supports your operations to reduce risk.

GUARDIAN RESPONDS TO SENTINEL ALERTS

- SENTINEL Alerts visibility - global coverage of crime, war, activism, militancy, and migration.
- All alerts are sourced, verified, and streamed in real-time.
