

AMBREY 

SAFETY & SECURITY

**We make it our business,
to protect yours.**

“We are an award-winning UK company, protecting more ships and crew than any other, with the largest footprint of deployed maritime security personnel across the globe.”

SAFETY & SECURITY

We make sure that you don't have to lose out on global trading opportunities; we keep ships, crew, and their cargo safe in some of the most dangerous maritime environments in the world.

Meeting the needs of our clients is our number one priority, and we pride ourselves on getting our clients the answers they need within an hour of enquiry. We run a manned office 365 days a year to make sure we can deliver a one-stop solution to our customers.

We have an owned fleet of vessels including, vessel-based armouries, security escort vessels and service supply ships. Whether you need an armed security team, a security escort vessel, threat intelligence and advisory services, or assistance managing a complex maritime security project, we have the experience, time, and knowledge to help.

ARMED GUARDS

1000+ guards currently work for Ambrey, trained in-house to an international standard and mobilised from all major ports around the Indian Ocean.

Our guards are deployed in teams that are blended to meet the requirements of the task and the needs of our client. We meet client requirements for any team-size or qualifications, subject to a risk assessment of your voyage. Our size and experience means we are well aware of the specific demands of individual flag states and major charterers. The large number of guards we have deployed on any given day, combined with our deployed coverage, also allows us to respond quickly to requests at short notice. Our fastest time from request to embarkation of a team is just under three hours – an industry benchmark.

To keep advice up to date we give our guards access to our in-house intelligence team, who provide alerts and advisory services to assist shipboard operations.

LOCAL NAVAL ARMED GUARDS

In West Africa and Southeast Asia, where local regulations do not allow us to use our own guards and firearms, we enable the deployment of host nation forces.

The guards are vetted in accordance with national requirements and selected for their role through the host nation recruitment process.

Due to the scale of our operations we have our own local staff and infrastructure in both West Africa and Southeast Asia, which provides additional collaborative oversight of deployed host nation forces, and allows us to quickly resolve any problems that may arise.

Our local teams are available on a 24/7 basis.

SAFETY & SECURITY

SECURITY ESCORT VESSELS

When local laws prohibit armed guards from being placed on board vessels, we ensure the safety and security of our clients by providing armed security escort vessels (SEVs).

Ambrey can provide SEVs, with armed guards onboard, in each of the main piracy areas globally. However, West Africa, and in particular Nigeria, is where we provide this service most frequently. Ambrey's market differentiator and strong advantage in Nigeria is our investment in a fleet of SEVs that provide consistent reliability at a manageable cost.

Each of our SEVs are deployed in compliance with state requirements, with a team of Local Naval Armed Guards and a Liaison Officer. All SEVs are fully equipped with the navigation and communications equipment needed to allow them to safely undertake all types of offshore security tasks - escorting, field protection and rapid response/intervention.

TRANSFER VESSELS

Ambrey are unique in the PMSC market as, unlike other maritime security providers, we operate and control a fleet of our own transfer vessels covering all entry/exit corridors to the Indian Ocean High Risk Area.

Owning vessels, licensed by the UK Government to operate as floating armouries, gives us complete control over our supply chain – from the vessels themselves to the people and equipment on board. This allows us to offer our clients certainty about the quality and consistency of our services, which is unique in our industry.

Our fleet of Transfer Vessels is managed and controlled by our in-house marine team, who are based at our shipyard in Southampton, UK. The fleet has been a major focus of investment over recent years, ensuring we have a robust, reliable and safe environment in which to accommodate our teams and transfer them to your vessels, 24/7.

TRAINING

Our extensive experience in developing and delivering accredited training programmes for staff and clients means that we're ideally positioned to build bespoke, compliance-led training in other areas of security.

Our services span a wide range of expertise, from 'Security Operations' and 'Crisis Management' to 'CCTV and Operations Room Management'.

Together we will identify what the training objectives are - what success looks like – to ensure we meet the identified learning opportunity. The courses are delivered by a small group of specialist trainers, supported by our team of dedicated in-house analysts who specialise in understanding the context in which the training will be executed.
